Bernoulli Society
for Mathematical Statistics and Probability

Reasons to join

A challenge of the 21st Century is how to best use data to improve our world. This is a challenge across all areas of science and society. The fields of probability and statistics have a leadership role in meeting this challenge by developing principled approaches to use and model data. Probability and statistical science allow you to contribute to all areas of society without boundaries.

By joining the Bernoulli Society you connect to a worldwide community of statisticians and probabilists. This is an important step towards establishing a broad global network of professional relationships to sustain your professional career over the long term. Getting involved in the Bernoulli Society is an excellent way of making scientific friends across the world. This can be done by running conferences; serving on the several Society committees; sharing news and information with other members through our channels; attending meetings; presenting your ideas; etc.

About the Society

The Bernoulli Society was founded in 1975 as a Section of the International Statistical Institute. The Bernoulli Society now has a membership representing nearly 70 countries, a third of those also being members of the ISI who chose the Bernoulli Society as their Association.

The activities of the Bernoulli Society include organizing or sponsoring international and regional meetings and publications, on its own or jointly with other professional societies. These meetings and publications have a prominent relevance in the fields of mathematical statistics, probability, stochastic processes and their applications.

Some benefits

Some immediate benefits of Bernoulli Society membership:
 • Reduced registration fees for meetings sponsored by the Society
 • Chance to participate in the New Researcher Awards
 • Online access to Bernoulli and to SPA journals
 • Receive Bernoulli News and the electronic bulletin e-Briefs

Sponsored conferences

 • 11th International Conference on Extreme Value Analysis
    Zagreb, Croatia, July 01 - 05, 2019
 • 41st Conference on Stochastic Processes and their Applications
    Chicago, July 08 - 12, 2019
 • 32nd European Meeting of Statisticians
    Palermo, Italy, July 22 - 26, 2019
 • 21st European Young Statisticians Meeting
    Belgrade, Serbia, July 29 - August 02, 2019
 • 62nd ISI World Statistics Congress
    Kuala Lumpur, Malaysia, August 18 - 23, 2019
 • XVII Latin American Congress of Probability and Math Statistics
    Merida, Yucatán, Mexico, December 01 - 06, 2019

Membership information

As incentives to become a member, the Bernoulli Society offers:
 • Reduced fees for first year of membership, early postdocs, couples, retired persons, and for members from developing countries
 • PhD Students join for free
 • Option to become a life member
 • Option to become a joint member of BS - IMS at a reduced rate
All the above members receive full benefits of a regular member
